

## HARDWARE

# Mesa 4K™ Terminal

Expand your view of gaming.

Designed to enhance the player experience, the new Mesa 4K™ terminal features a streamlined cabinet, open sightlines, modern electronics, and superior efficiency. Concurrent games and a new user interface create an immersive experience that can allow players to view and play up to four high-definition games simultaneously.

### Benefits and Features

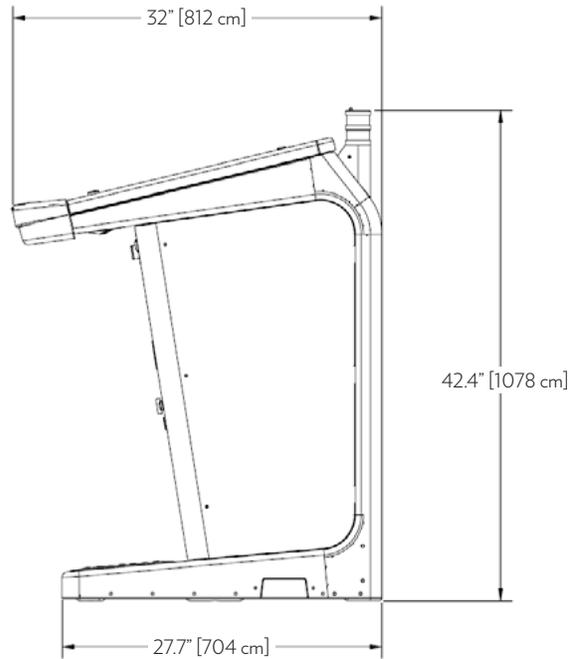

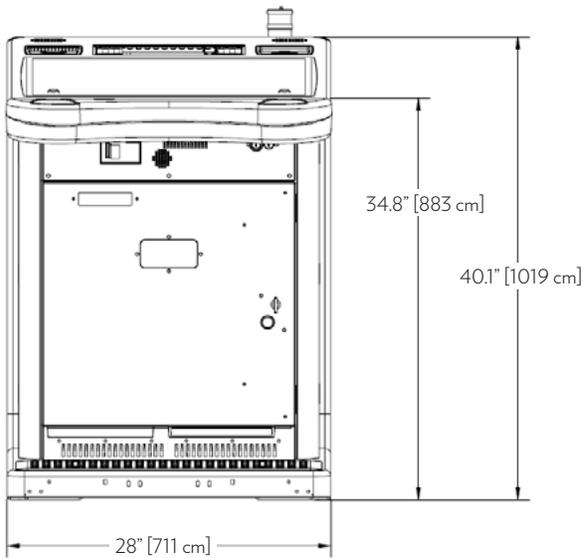

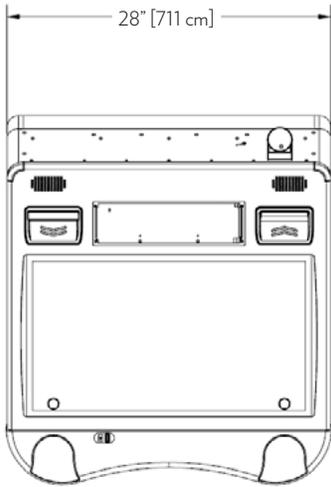

- New wheel housing and customizable sign package with updated lighting creates superior visual appeal.
- Updated software and firmware improve the play experience, allowing up to four high-definition games to be played at the same time.
- New central processing unit offers improved efficiency, setup and serviceability.
- Streamlined design and contoured back improve sightlines to the wheel and reduce footprint.
- Beautiful 27" 4K display enhances player comfort for increased time on device.
- Multiple layout configurations for live, auto, RNG, and hybrid configurations available to maximize revenue for your gaming floor.

### • Differentiation

- IGT's products are supported with full field service capabilities and infrastructure to ensure top quality success for operators and efficient response times.
- Side-bets create a more dynamic player experience while increasing time on device and improving house advantage.
- Drag and Drop functionality allows players to create a unique gaming experience of their own.
