

IGT Beverage on Demand Add-Ons

The next step in beverage management

Bring the Beverage on Demand experience to the next level with our POS Integration or Intelligent Beverage on Demand.

POS Integration

POS integration works with InfoGenesis to quickly integrate your menu in the Beverage on Demand application. Save time during setup and update menus in a snap.

Intelligent Beverage on Demand

Tailor beverage and menu options based on the customer attributes like ranking and birthday. Intelligent Beverage on Demand leverages player data to provide the most personalized experience, including player favorites, pricing and menu specials based on age and more.

Intelligent Beverage on Demand empowers your staff with a mobile app to take drink orders wherever the players are, streamlining workflows and improving customer service.

Turn beverage service into a personalized player experience with Beverage on Demand's add-ons. Talk to your Account Manager today.
